

National Energy Codes Conference Nashville, TN March 24, 2015

Texas Field Study

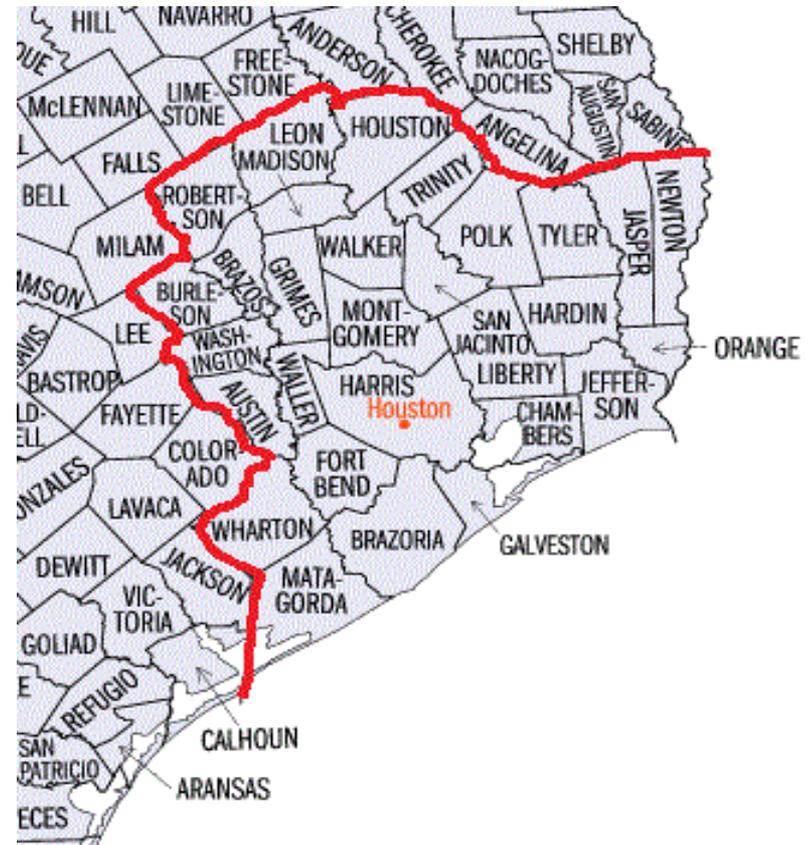

Data Collection Area

Thirty counties in SE Texas anchored on Houston, represents ~30% of permits, and ~26% of state population

Results to be extrapolated to entire state for education, training and utility program development

Eliminate Exceptions

To be sure the data collected reflects statewide building practices we will not evaluate:

- Basements or foundation insulation
- Homes over 5,000 sq. ft.
- Homes that are “stilt-built” in the hurricane coastal area

Viral Approach to Education

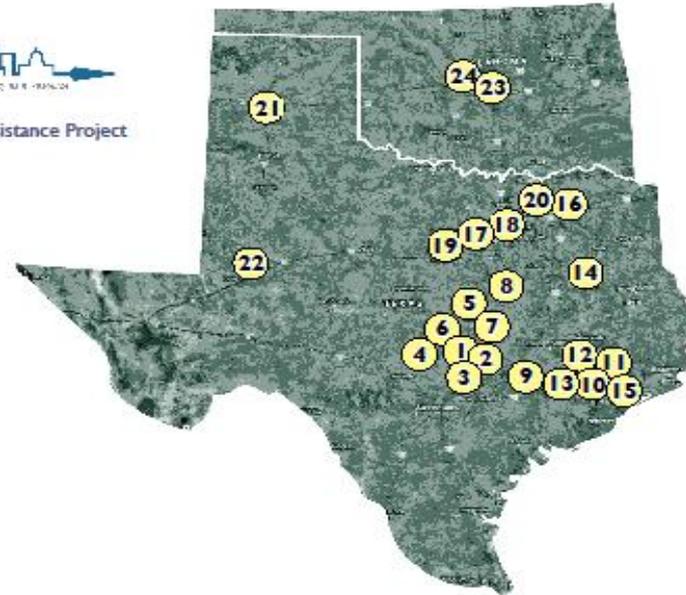

SPEER's plan for education and outreach using:

- E-Code Ambassadors – provide local assistance and energy code trainings
- Regional Working Groups developed to engage builders, contractors, and inspectors
- Speakers' Bureau – utilizing the knowledge in the industry to provide frequent and varied webinars and in-person training
- Training will be targeted – based on field data

Who is EUMMOT?

The Electric Utility Marketing Managers of Texas (EUMMOT) is a voluntary organization of electric investor-owned utilities formed to address utility industry energy efficiency issues and facilitate coordination of utility programs

AEP Texas Central
AEP Texas North
CenterPoint Energy
El Paso Electric Co.
Entergy Texas
Oncor
Southwestern Electric
Power Company
Texas-New Mexico
Power
Xcel Energy
Sharyland

Utility Review and Analysis

EUMMOT collaborating with Field Study to help design new programs to support code compliance. May include incentive programs, educational programs, or manufacturer rebates...
