

Public Comment RE146-16 WILLIAMS-C:

Proponent : Jeremiah Williams, representing U. S. Department of Energy (jeremiah.williams@ee.doe.gov) requests Disapprove.

Commenter's Reason: The proposal deletes any specification of vertical fenestration area in the Standard Reference Design, leaving the proper input value against which the Proposed Design must be compared unstated. This ambiguity will make the Simulated Performance Alternative confusing and/or unenforceable.
